

## AGWA Technical Support

Posted by isburns - 2007/11/03 23:19

---

For problems or errors not described in user manual or in these forums, please post a message in the appropriate forum. Before doing so, make sure you are using the newest version of AGWA 1.5 – many problems can be resolved by updating the extension. If this does not resolve the problem, provide technical support with the following information:

- \* the exact error message displayed,
- \* the task being performed (i.e. Watershed delineation, land cover and soils parameterization, etc.),
- \* the type of watershed being used (KINEROS, SWAT, buffered, etc.),
- \* the type of inputs used, and
- \* any other relevant information that could aid in the timely resolution of the problem.
